LUMBERJACK

Congratulations on your purchase of the LUMBERJACK, the revolutionary new log overdriver by ELECTRO-HARMONIX. The distortion character of the LUMBERJACK changes depending on your playing dynamics, ranging from a powerful clean boost to subtle torn-speaker overdrive to gritty distortion. The LUMBERJACK is housed in a durable, compact die-cast chassis, and includes true-bypass switching to keep your bypassed tone intact.

- CONTROLS -

BOOST Knob – This knob controls the volume of your input signal. It can be used to boost a quiet guitar, to achieve more distortion, or, when set to higher settings, allows your natural guitar tone to blend with the overdriven signal.

LOG FACTOR Knob – This knob controls the amount of logarithmic distortion created by the LUMBERJACK. As you turn LOG FACTOR clockwise, overdrive distortion increases.

VOL Knob – Sets the output level of the LUMBERJACK.

FOOTSWITCH and LED – The Footswitch selects whether the LUMBERJACK is engaged or in true bypass mode. When the effect is engaged, the LED is lit.

INPUT Jack – This ¼" jack is the audio input for the LUMBERJACK. The input impedance is 1MΩ.

AMP Jack – This ¼" jack is the audio output from the LUMBERJACK. The output impedance is 100Ω.

9V Power Jack – Plug the output of the supplied AC adapter into the 9V power jack located at the top of the LUMBERJACK. The LUMBERJACK requires 100mA at 9VDC with a center negative plug. The LUMBERJACK accepts Boss/Ibanez style AC Adapters.

- WARRANTY INFORMATION -

Please register online at <http://www.ehx.com/product-registration> or complete and return the enclosed warranty card within 10 days of purchase. Electro-Harmonix will repair or replace, at its discretion, a product that fails to operate due to defects in materials or workmanship for a period of one year from date of purchase. This applies only to original purchasers who have bought their product from an authorized Electro-Harmonix retailer. Repaired or replaced units will then be warranted for the unexpired portion of the original warranty term.

If you should need to return your unit for service within the warranty period, please contact the appropriate office listed below. Customers outside the regions listed below, please contact EHX Customer Service for information on warranty repairs at info@ehx.com or +1-718-937-8300. USA and Canadian customers: please obtain a **Return Authorization Number (RA#)** from EHX Customer Service before returning your product. Include with your returned unit: a written description of the problem as well as your name, address, telephone number, e-mail address, and RA#; and a copy of your receipt clearly showing the purchase date.

- FCC COMPLIANCE -

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. If the device is not installed and used in accordance with the instructions, it may cause harmful interference to radio communications and void the user's authority to guarantee the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- *Reorient or relocate the receiving antenna.*
- *Increase the separation between the equipment and receiver.*
- *Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.*
- *Consult the dealer or an experienced radio/TV technician for help.*

Modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment under FCC rules.
